

TECHNICAL DATA SHEET

INESFLY EM HOUSE FLOOR CLEANER

DESCRIPTION

Inesfly EM House Floor Cleaner is a floor cleaner that contains microencapsulated insecticides to control crawling insects (cockroaches, ants, fleas).

The product is formulated to clean all types of dirt, especially grease and oils and has a pleasant citric odor. It can be used in all types of floors due to its neutral PH. Its composition ensures low foaming when applied with sweepers.

The insecticidal effect of Inesfly EM House Floor Cleaner protects surfaces for a week (unless the floor is cleaned over again).

INESFLY TECHNOLOGY

The Inesfly technology consists of polymeric micro-encapsulations that allow the insecticides to be released in a gradual and slow manner, thereby prolonging the efficacy and reducing the toxicity of the active ingredients making it completely safe for humans, pets and other animals. Another fundamental contribution to the effectiveness of Inesfly products is the inclusion of Insect Growth Regulators (IGR), which prevent the insects from fully developing and reproducing.

COMPOSITION

Alphacypermethrin	0.3%
D-allethrin	0.3%
Pyriproxyfen	0.063%
Mixture of non-ionic surfactants	

USES:

Floors in buildings such as warehouses, storage areas and homes. It is recommended in spaces such as warehouses, storage areas, terraces, basements, cellars, and kitchens etc where protection from crawling insects is needed.

APPLICATION PROCEDURE

Dilute EM House Floor Cleaner before use. Add 2 capfuls of Floor Cleaner to 5L of water. It can be used for both manual cleaning with a mop and with cleaning machines (sweepers).

Rinsing after mopping is not necessary.

For stubborn stains or heavily soiled floors dilute the product as above and clean the surface using the machine without the suction mode.

Wait 1 minute and repeat the action with the suction mode.

RECOMMENDATIONS

Shake well before use.

Do not ingest.

Immediately rinse with plenty of water in case of contact with eyes, or open skin and wounds.

Keep away from food, drinks & utensils.

Keep out of the reach of children.

Keep children away from the treated surfaces.

Rinse treated surfaces before putting food items on them.

Adequately ventilate the area after application.

Do not mix with other chemicals.

TOXICOLOGICAL CLASSIFICATION

No toxicological classification.
